

- The diagram illustrates a complex mapping or transformation between two datasets. At the center is a pink circle containing a camera icon and the text "firstytoothbox". Below this, the text "no catfish!" is visible. Two sets of data tables are positioned on either side of the center, connected by lines that suggest a mapping or transformation between the two datasets.

**Left Dataset Table:**

year*	lost	eruption	month*
6-8	...../...../.....	...../...../.....	8-9
7-9	...../...../.....	...../...../.....	12-30
10-11	...../...../.....	...../...../.....	20
9-11	...../...../.....	...../...../.....	16
11-12	...../...../.....	...../...../.....	12-30

**Right Dataset Table:**

year*	lost	eruption	month*
6-8	...../...../.....	...../...../.....	8-9
7-9	...../...../.....	...../...../.....	12-30
10-11	...../...../.....	...../...../.....	20
9-11	...../...../.....	...../...../.....	16
11-12	...../...../.....	...../...../.....	12-30

The central point is labeled "firstytoothbox" and "no catfish!". The lines connecting the tables to the center suggest a mapping or transformation between the two datasets.

The development of milk teeth from six months onwards, the tooth card hereunder shows the average eruption times and times that the primary teeth and molars come loose.
